Charlie

Thanks for helping. This is a long message, so feel free to call for clarification. This entire conversation relates to disposal of Pile #1 which contains 50>PCBs<1000 and RCRA metals (D006 and D008), The pile is estimated 1400 cu yards

1. Bid analysis worksheet awarded EnviroSafe contract for disposal in Subtitle C. However, UHCs failed for dioxin (see attachment P 59). EnviroSafe rejected the waste stream
2. 

**Ex. 5 Deliberative Process (DP)**
3. I reached out to ERT to ask for help. See below. They sent me to CWM
4. CWM cannot take the waste because PCBs>500

So,

**Ex. 5 Deliberative Process (DP)**

My computer battery is about to die, so please call w/ questions  
Thanks  
Chris

Here is a email from her that might help with estimate?

It was nice chatting with you... Feel free to reach out any time you have budgetary or acceptance questions, we're happy to help!

Below are the "worst case" budgetary numbers for Nonresponsive based on revised scope This is for Direct landfill, Subtitle "C", assuming dioxins are too high for subtitle "D" acceptance:

**Ex. 4 CBI**

Nonresponsive based on revised scope will send you the Subtitle "D" numbers this afternoon shipping to our Richland Landfill.

Thanks!

**Nonresponsive based on revised scope**

Hazardous Waste SME

**Nonresponsive based on revised scope**

Please see request from Christine Wagner, OSC in R3. If anyone can assist her, please let me and Dee know that and then give Christine a call.

Thanks

**Subject:** Looking for Dioxin disposal assistance

Hi Marc,

I have a removal Site in R3 involving a waste pile w/  
PCBs and RCRA metals. The facility rejected it because  
dioxin was > LDR. We are exploring various options,  
including whether we can treat the metals and treat it as

TSCA waste. Is there anyone at ERT who may have experience in this area?

Thank you  
Chris
